

NFX-Datasheet

Component : BetterPictureLoader

Version : 5.10 | **NOF 2/3** **NOF 4/5**

Description : In NetObjects Fusion you are not able to insert remotely located graphics (i.e. pictures not on your local system) into your site. With this component, you can insert graphics similar to remotely-located counter images. You also can set a link, a link-target and an alternative-text for this component.

<u>Properties</u>	<u>Description</u>
• Wizard :	Double-Click this property to open the wizard or choose the Wizard-Tab you want to see first.
• Image URL : (required)	Here you enter the URL of the graphic you want to insert. It's also possible to use the URL of a CGI-script or comparable resource.
• Image Name : (optional)	Here you enter a name with which this graphic is referenced internally. If left empty a default name is used.
• Link URL : (optional)	Here you enter the link-URL for the graphic
• Link Target : (optional)	Here you enter the name of the frame or window where the page specified as "Link URL" will be displayed
• Alternative Text : (optional)	Here you enter alternative-text which will be displayed if the browser isn't able to load the graphic or if the mousepointer is over the picture.
• Border Width : (optional)	Here you enter the size of the border which will be displayed around the graphic. The default value is 0 (no border).
• Use Custom-HTML :	Here you choose if the Custom-HTML entered in the Wizard is inserted when publishing or not.
