

NFX-Datasheet

Component : ComponentManager

Version : 5.00 | NOF 2/3 NOF 4/5

Description :

This Component helps you to manage some of the settings that apply for all Components.

How to call the Component :

Because this is no normal Component like my other one's, you will not find it on the Components-Toolbar. To activate this Component go in the SiteView and go to the File|Launch Site Wizard menu. In the dialog that is opened now you see the component called „Apollon ComponentManager 4.00“.

Click on it and the Component will start.

What can I do with this Component :

- Set the Component-Language for all used Apollon-Components. You currently can switch between English and German.

For questions, suggestions or on problems contact me.
