

# NFX-Datasheet

**Component :** InsertIt

**Version :** 3.50 | NOF 2/3  NOF 4/5

**Description :** With this component you can insert lines of text, textfiles or redirects into your pages.  
This component is useful if you want to add the same script to multiple pages, allowing you to maintain a library of script files which are inserted on the pages you want. When changing of these script files you affect all ages that use this script file.

<u>Properties</u>	<u>Description</u>
• <b>Insert What? :</b>	Choose what you want to insert using the Component : textlines entered in the component, a textfile or a redirect to an other page.
